DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 11-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Ansmann et al (6,228,831).

Ansmann et al disclose a pearlescent concentrate comprising 1 to 99% by weight of a fatty compound selected from the group consisting of fatty alcohol, fatty carbonates, fatty ketones and mixtures thereof; .1 to 90% by weight of emulsifiers such as anionic, nonionic, amphoteric and cationic surfactants such as cocamidopropyl betaine (col. 4, lines 44-45) and up to 40% by weight of polyols (see abstract). Ansmann et al further teach that said nonionic emulsifiers include polyol esters such as polyglycerol poly-12-hydroxy-stearate; polyglycerol esters and mixtures (col. 3, lines 35-55). Ansmann et al further teach mixing each of said components at a temperature of 1 to 30 degrees Celsius (claim 11). Note, see table 1 and claims.

As this reference teaches all of the instantly required it is considered anticipatory.
